

SUMMARY

With an engineer's mind, artist's eye, and empathetic heart, I am a designer who champions for great user experiences.

WORK EXPERIENCE

Product Designer | Retalent | www.retalent.io Dec 2017 - Present

Retalent pairs research in psychometrics, psychology, and behavioral neuroscience with machine learning to help companies hire better and retain their existing talent. As Retalent's first product designer, I work closely with the company's CEO to ensure an optimal user experience across the application (currently in Alpha). My responsibilities include designing candidate/employer/recruiter dashboards and job simulation assessments, maintaining the information architecture and user flows for the application, maintaining the branding and style guide, and print design for the startup's white paper.

Product Designer | Trusted Health | www.trustedhealth.com Sep 2017 - Dec 2017

Trusted Health is a job platform for nurses with a marketplace to connect nurses to employers and helpful tools to assist nurses throughout their career journey. As an early designer, I helped launch the application with a new design framework and tech stack. My responsibilities included competitive/comparative analysis, conducting surveys and user interviews, developing personas, optimizing user flows throughout the application, maintaining the branding and style guide, and developing visual assets for social media.

Freelance Designer & Developer May 2016 - Present

Selected Client Case Studies:

Lead Designer & Developer | Coalition on Homelessness | Case Study: <http://crystal2cross.github.io/coh.html>

Coalition on Homelessness (COH) is a 30-year-old non-profit aimed at finding and addressing the root causes of homelessness and poverty in San Francisco. As a hired consultant, I designed and implemented a responsive website for their organization. The project focus was on information architecture, branding/visual design, and responsive design.

Lead Designer & Developer | Street Sheet | Case Study: <http://crystal2cross.github.io/streetsheet.html>

Street Sheet is a biweekly newspaper that reaches 16,000 readers through 230 homeless or low-income vendors, who are not made to pay for the newspapers that they receive, and who keep all money they earn through Street Sheet distribution. As a hired consultant for the non-profit, I designed and implemented a responsive website that is an extension of their print newspaper. The website archives all articles with additional web-only content, and it is optimized for reading on all screen sizes.

Software Engineer | AppDirect | www.appdirect.com Apr 2015 - Feb 2016

AppDirect is a cloud service platform provider enabling people to create, find, buy and manage software in the cloud. As a member of multiple engineering teams, I helped to: develop AppDirect's OAuth management panel; design and implement a themed partner marketplace for Hawaiian Telecom; and troubleshoot issues and bugs for our existing, high-profile partners. Technologies used: Javascript, HTML, CSS (Sass), Backbone.Marionette, and Java.

Web Developer | Sungevity | www.sungevity.com Jun 2014 - Apr 2015

Sungevity is a solar power provider helping the world run on the sun. As a member of multiple engineering teams, I helped to develop their customer portal and Instant IQuote (IIQ) iPad web application. Developing for IIQ, I was responsible for the user flow and interface of the application. The development on IIQ was rapid, and as a developer on that team, I needed to quickly respond to real-time feedback from field members using the app in Lowes hardware stores and at Sungevity marketing events. Technologies used: JavaScript, HTML, CSS, JQuery Mobile, AngularJS, Scala, Play (Scala Web Framework), and PHP.

ADDITIONAL WORK EXPERIENCE

Web Developer Internship | Moovweb | www.moovweb.com

Mar 2014 - Jun 2014

Moovweb is a platform enabling businesses to transform their desktop-only websites to mobile and tablet experiences. As a member of a 3-person developer team, I helped to transform Forever21's desktop-only website into a modern, fully-responsive online retail experience utilizing JavaScript, HTML, CSS (Sass), and various JavaScript libraries including jQuery, Tritium, and Uranium.

SKILLS

UX: Information Architecture, User Research, Personas, Rapid Prototyping, Wireframes, Usability Testing

Tools: Sketch3, InVision, Paper Prototyping

Technical: HTML, CSS, JavaScript, Git

PROFESSIONAL TRAINING

General Assembly, User Experience Design Immersive

May 2016 Cohort

Selected Project Case Studies:

UX Designer, Homes.com | View Case Study: <http://crystal2cross.github.io/homeshare.html>

I designed a companion website for Homes.com to help people who can't afford to buy a home, find and meet people to join forces and buy their dream home with. Deliverables included personas, journey maps, wireframes, and click-through prototype.

UX Designer, Progress Hardware | View Case Study: <http://crystal2cross.github.io/progress-hardware.html>

I designed an ecommerce website for a brick and mortar hardware store. Deliverables included navigation system, streamlined checkout process, wireframes, and click-through prototype.
